

7 April 1966

MEMORANDUM FOR: Director of National Estimates

SUBJECT: Aviation Weapons Presentation
Friday, 8 April 1966

1. In accordance with a previous request by the members of the Board, I have arranged for a naval officer to brief the Board on naval types of aviation ordnance which is now in use in the Far East by the Air Force and the Navy.

2. Commander Camp, USN, and Lt. Commander Lighter have been designated by the Navy to give this briefing. They will brief us on bombs and fuses available and in use in Southeast Asia and on the weapons in R&D which will become available for use in the future. In view of the conversation regarding supplies of these weapons, I have asked them to brief us on the stock pile situation. Both of these officers are naval aviators and have had considerable experience with the weapons concerned. Commander Camp has had a great deal of carrier experience and Lt. Commander Lighter is a specialist in the ordnance field. The briefing will last approximately one hour followed by a question period if and as desired.
